Then everything comes together on a virtual breadboard for the. By use of compression I'll explain exactly how to configure the. Com the virtual breadboard.Q: How to execute action at a fixed position from a button on a UIView (in iPhone) My question is: How to invoke an action and send the parameters from a button from a UIView? I tried to use the usual code: [button addTarget:self action:@selector(giveData:)]; but this call doesn't allow me to have parameters. And I can't set a UILabel as target because I want to perform a search at some position in my UIView. Thank you for your help. EDIT: I want to get a array with informations from the user and then retrieve some coordinates to do some operations by using the "awkward" code: [self.view addGestureRecognizer:tapRecognizer]; [self.view addGestureRecognizer:panGestureRecognizer]; [self.view addGestureRecognizer:rotationGestureRecognizer]; When the user tap the correct coordinates, I want to execute the giveData method. The problem is I can't initialize it. 50b96ab0b6
